## **Minutes of the first meeting on the purpose of building an application to GEO initiative**

The meeting was held virtually on 25th January 2022.

The meeting was attended by representatives from GEO, WMO, and relevant RPOs, and was followed from the meeting with the ACTRIS Scientific and Implementation Advisory Board in 2021.

The meeting discussed the importance of an organized representation of short-lived species (SLCS) research in the GEO, and the possibility of building a joint GEO initiative on SLCS and climate.

As a next step, the different groups WMO that attended the meeting will discuss on their view on the opportunity to submit a GEO initiative. After this round a follow-up meeting with the international stakeholders will be held.

Detailed minutes of the meeting were taken by the GAW secretariat.
