

# POSTER SESSION MAP / WEDNESDAY

# POSTER SESSION MAP / WEDNESDAY

| Board | Last Name           | Theme | Abstract # | Title   |
|-------|---------------------|-------|------------|---|
| 37    | Bazo                | 3     | 6          | Characterization of the optical and polarimetric properties of Saharan dust during two extreme events   |
| 38    | Boichu              | 3     | 11         | VOLCPLUME, an interactive web portal dedicated to the multiscale monitoring of volcanic emission  |
| 74    | Borbon              | 5     | 204        | Health Risk of the Tajogaite volcanic eruption in La Palma: disentangling urban and natural contributions   |
| 42    | Burgos Cuevas       | 3     | 106        | Quantifying energy budgets in the Atmospheric Boundary Layer over western Germany   |
| 24    | Callaghan           | 1     | 227        | Comparison of NO <sub>x</sub> in the remote marine boundary layer in the Northern and Southern hemispheres  |
| 35    | Cash                | 1     | 308        | Response of organic aerosol to Delhi's pollution control measures over the period 2011–2018   |
| 9     | Claude              | 1     | 103        | Long time series of volatile organic compounds at the German Meteorological observatory Hohenpeißenberg   |
| 8     | Collaud Coen        | 1     | 68         | Methodology of long-term trend analysis: limitations in the application of parametric fitting and non-parametric methods                                |
| 60    | Collaud Coen        | 5     | 55         | SwissPollen: Real-time monitoring of bioaerosols across Switzerland   |
| 31    | Colomb              | 1     | 266        | 10-year monitoring (2012-2022) of atmospheric gas composition at the Puy de Dôme research station   |
| 63    | Crumeyrolle         | 5     | 79         | Atmospheric dynamics on new particle formation (NPF) in Lille   |
| 19    | Dandocsi            | 1     | 162        | Long-term variability of black carbon concentrations at a suburban super-site near Bucharest, Romania   |
| 23    | De Mazière          | 1     | 208        | The importance of long-term reactive trace gas remote sensing measurements for ACTRIS science and data  |
| 49    | De Rosa             | 3     | 192        | A Saharan dust intrusion in Potenza characterized through lidar linear depolarization ratio at three different altitudes                                |
| 80    | Drzeniecka-Osiadacz | 5     | 281        | Chemical compositions and sources contribution of urban aerosols during winter in Wrocław, Poland   |
| 81    | Drzeniecka-Osiadacz | 5     | 282        | Meteorological influences on Black Carbon concentration in Wrocław, Poland.   |
| 7     | Evangelidou         | 1     | 54         | Atmospheric Microplastic in the Arctic and Mainland Norway; occurrence, composition and source: a case study  |
| 18    | Evgenieva           | 1     | 159        | Studies of the annual aerosol circulation over Sofia, Bulgaria  |
| 20    | Fauvel              | 1     | 176        | Spatial and temporal trends of atmospheric NH <sub>3</sub> and aerosol NH <sub>4</sub> <sup>+</sup> concentrations inferred from long-term measurements |
| 56    | Fernández-Olmo      | 5     | 30         | Chemical and size fractionation of particulate matter near a ferromanganese plant to assess its oxidation state   |
| 4     | Fossum              | 1     | 39         | Long-term trends (>15 years) of submicron aerosol chemical composition in a remotecoastal site: implications for climate                                |
| 67    | Fratticioli         | 5     | 130        | The importance of the elemental analysis for the chemical characterization of the aerosols and the identification of their sources                      |
| 5     | Frka                | 1     | 42         | Sources and processes affecting aerosol concentrations and deposition to the sea surface of the coast   |
| 64    | Galindo             | 5     | 80         | Gaseous and particulate emissions from the open burning of wastes from tree pruning and hedge trimming  |
| 77    | Galindo             | 5     | 248        | The influence of carbonaceous components on the oxidative potential of PM <sub>10</sub> in a rural area of southern Spain                               |
| 78    | Galindo             | 5     | 253        | Methanol-soluble organic carbon in PM <sub>10</sub> at a rural site in southeastern Spain.  |
| 76    | Gherras             | 5     | 221        | Optimizing the Parameters of the Black Carbon Source Apportionment Model: Unveiling Ångström Exponent   |
| 53    | Giannakaki          | 3     | 285        | Pollen observation in Athens detected by Burkard pollen trap using space-based data from CALIPSO  |
| 59    | Glušćić             | 5     | 40         | Organic and inorganic water-soluble compounds in PM <sub>2.5</sub> and their sources in urban environment   |
| 55    | Godec               | 5     | 14         | Carbon pollutants in PM <sub>1</sub> at an urban canyon location  |
| 41    | Gonzalez            | 3     | 82         | Physical properties of aerosols at Izaña Observatory during the recent extreme dust events impact on the environment                                    |

## POSTER SESSION MAP / WEDNESDAY

|    |               |   |  |
|----|---------------|---|--|
| 26 | Gros          | 1 | 231 Characterization of Volatile Organic Compounds in 2020-2021 and source apportionment of VOC at       |
| 58 | Hejkrliková   | 5 | 34 Time-serial analysis of outdoor air pollution and absence of children in kindergarten due to respirat |
| 71 | Hey           | 5 | 150 Black carbon source contribution in two urban environments during summer and winter seasons          |
| 69 | Hopkins       | 5 | 135 Observations of VOC composition in UK urban environments   |
| 66 | Ilie          | 5 | 108 Spatial mapping of air pollution in Bucharest using mobile measurements                              |
| 1  | Kazadzis      | 1 | 15 Long term comparisons of aerosol optical depth measurements; differences and trends                   |
| 44 | Kazadzis      | 3 | 153 Long range transport of smoke over Switzerland: aerosol properties and spectral features             |
| 13 | Klejnowski    | 1 | 132 Seasonal variability of eBC and TC in atmospheric aerosol, on the example of real-time measureme     |
| 65 | Klejnowski    | 5 | 98 Biomass burning tracers and organic carbon in atmospheric aerosol PM1and PM2.5                        |
| 33 | Kovářík       | 1 | 288 Vertical gradients of atmospheric aerosols chemical composition                                      |
| 39 | Kristensson   | 3 | 29 Dust aerosols, a challenge for agriculture  |
| 29 | Kubistin      | 1 | 244 Trends of surface ozone and its precursors over 20 years in Southern Germany                         |
| 10 | Lhotka        | 1 | 107 Long-term trend of non-refractory PM1 concentrations at a background station in Central Europe       |
| 46 | López-Cayuela | 3 | 166 Characterization of the Earth-atmosphere system conditions during a dust-induced heatwave in su      |
| 47 | López-Cayuela | 3 | 175 Assessment of the vertically-resolved aerosol radiative effect during an intense dust outbreak over  |
| 57 | Mangold       | 5 | 31 Aerosol in-situ physical properties measured at the future ACTRIS site in Brussels with emphasis on   |
| 61 | Manzo         | 5 | 65 Unusual aerosol load over the Naples urban area following victory of the national football champio    |
| 48 | Masoom        | 3 | 182 Effect of wildfires on aerosol optical and microphysical properties, transport and ageing            |
| 34 | Matos         | 1 | 301 Temporal trends of equivalent black carbon (eBC) components in the metropolitan area of Valencia     |
| 22 | Mazzini       | 1 | 194 Variability in Aerosol Size Distribution and New Particle Formation at the Monte Cimone GAW Glob     |
| 51 | Michailidis   | 3 | 236 Extreme wildfires over northern Greece during summer 2023: Investigating the effects on aerosol c    |
| 62 | Minderytė     | 5 | 75 Physicochemical PM1 characterization for connected-flow events between Hyltemossa and Preila c        |
| 75 | Minvielle     | 5 | 216 Individual exposition at UV radiation and atmospheric pollution in Hauts-de-France region.           |
| 28 | Mona          | 1 | 241 Enhancing interdisciplinary Research and Innovation capacities addressing environmental societal c   |
| 3  | Montoux       | 1 | 26 Lidar ratio calculations from in situ aerosol optical, microphysical and chemical measurements: obs   |
| 36 | Motiaa        | 1 | 310 Multi-year measurements from the Atlas station in Morocco (AMV)                                      |
| 12 | Muñiz-Rosado  | 1 | 126 Long-term variability of satellite and ground-based aerosols in a high mountain environment          |
| 16 | Muñoz-Porcar  | 1 | 145 Analysis of radiative fluxes and aerosol optical depths over 14 years in Barcelona, Spain            |
| 70 | Muñoz-Porcar  | 5 | 146 Aerosol retrievals by combining lidar volume depolarization ratio and sun-photometer DoLP in the     |
| 52 | Mylonaki      | 3 | 245 Estimation of the radiative impact of smoke aerosols from forest-fires, using two different algorith |
| 21 | Nieminen      | 1 | 190 Long-term trends of particle size-distributions and new particle formation at San Pietro Capofiume,  |
| 30 | Pazmiño       | 1 | 257 Trends in polar ozone loss since 1989: Potential sign of recovery in Arctic ozone column             |

## POSTER SESSION MAP / WEDNESDAY

|    |              |   |  |
|----|--------------|---|--|
| 54 | Peshev       | 3 | 287 Lidar and sun-photometer observations of Saharan dust loads above Sofia, Bulgaria, during the July   |
| 72 | Pirloaga     | 5 | 151 Wind and turbulence statistics over Măgurele using ground-based measurements                         |
| 43 | Poutli       | 3 | 139 Lidar observations of wildfire smoke in Cyprus during 2021-2023                                      |
| 45 | Poutli       | 3 | 154 Properties of heavy precipitation events during the CyCARE campaign                                  |
| 14 | Read         | 1 | 138 Ozone and Carbon Monoxide Trends at the Cabo Verde Atmospheric Observatory (CVAO)                    |
| 2  | Rocco        | 1 | 21 Implementation of long-term VOC measurement at the remote tropical background GAW station, I          |
| 50 | Skupin       | 3 | 232 Mineral dust intensive study within the aerosol and cloud remote sensing infrastructure at Cape Ve   |
| 6  | Speidel      | 1 | 50 A new generation of turbulence-resolving water vapor lidars: Implications on the understanding of     |
| 17 | Suchánková   | 1 | 152 Multi-annual characterisation of PM1 aerosol optical properties, size distribution and chemical con  |
| 82 | Szczepanik   | 1 | 134 Optical properties of mineral dust mixtures derived from a decade of lidar observations over Warsa   |
| 68 | Toledano     | 5 | 133 Aerosol properties retrieved under high turbidity conditions and the corresponding aerosol radiativ  |
| 15 | Vasilescu    | 1 | 143 Temporal variability and aerosols source apportionment at RADO- Bucharest, Romania                   |
| 40 | Verreyken    | 3 | 36 Volatile organic compound characterization and reactivity at a mixed forest site in the Belgian Arde  |
| 25 | Vigouroux    | 1 | 229 Long-term trends of tropospheric ozone and its precursors (HCHO and CO) from the NDACC FTIR gr       |
| 27 | Voudouri     | 1 | 233 Cloud vertical profiling and cloud types over Thessaloniki using active and passive remote sensing.  |
| 11 | Wagner       | 1 | 121 Extended aerosol optical depth (AOD) time series analysis in an alpine valley: a comparative study f |
| 32 | Yubero Funes | 1 | 277 Size distributions and number concentration of ultrafine particles in a suburban station in southeas |
| 79 | Yubero Funes | 5 | 278 Intercomparison of aerosol chemistry between urban and rural sites: Importance of biomass burnin     |
| 73 | Zouzoua      | 5 | 156 USING SUPERVISED NEURAL NETWORKS TO BETTER EVALUATE SURFACE TURBULENT HEAT FLUXES                    |
