

ACTRIS Science Conference 2024

Rennes, France

13-16 May 2024

Sponsors and exhibitors

ACTRIS

*Meeting tomorrow's major environmental challenges:
air pollution and climate change*

The Aerosol, Clouds and Trace Gases Research Infrastructure (ACTRIS) is the pan-European research infrastructure producing high-quality data and information on short-lived atmospheric constituents and on the processes leading to the variability of these constituents in natural and controlled atmospheres.

We offer access to our world-class facilities providing researches, from academia as well as from the private sector, with the best research environments and expertise promoting cutting-edge science and international collaborations.

ACTRIS Science Conference 2024

*Elevating atmospheric science
Connecting experts worldwide*

With over 100 research facilities located across Europe and beyond, ACTRIS is open for science and innovation.

Industry, including small and medium-sized enterprises (SMEs), organisations and networks operating in the scientific fields relevant to ACTRIS have the opportunity to showcase their contributions in this scientific journey.

The conference related to atmospheric sciences

The 2024 ACTRIS Science Conference is the **first physical edition** of the event. This international conference brings together researchers and engineers in the field of air quality and, more broadly, sustainable development and health. Several hundred people and numerous remote participants are expected to attend this major atmospheric science event.

The conference will be structured around plenary sessions and more convivial moments such as scientific poster presentations and an opening ceremony. Activities in the region will also be offered to participants.

Long-term trends and variability of the atmospheric composition

Atmospheric processes in the natural or controlled atmospheres

Extreme events : heat waves, forest fires, strong precipitation, droughts...

Innovative technologies for atmospheric observation

Impacts on health and ecosystems in urban areas

ACTRIS Science Conference 2024 in Rennes

The city of Rennes will host the first physical edition of the ACTRIS Science Conference

The venue is located at the **Couvent des Jacobins**, at the heart of the city. Built in the XIVth century, it was recently renovated as a congress centre. At the crossroads of historical heritage and cutting edge architecture, the Couvent des Jacobins is unlike any other building in Rennes.

Brittany is a region scattered with incredible monuments and landscapes enabling us to offer one special and unforgettable excursion.

What's more ? Rennes is just 1 hour and 30 minutes away by train from Paris city centre and there are connections to Europe's major capital cities.

Exhibitor and sponsor fees

Exhibitor

- Ideal location for exhibition, inside coffee & buffet areas and beside the conference room (Nef)
- 2 regular registrations included (access to the plenary sessions and other events* located in the Couvent des Jacobins)
- Name of your company/organisation displayed on the list of exhibitors on the conference website and on the promotional material

3000 €*

Sponsor

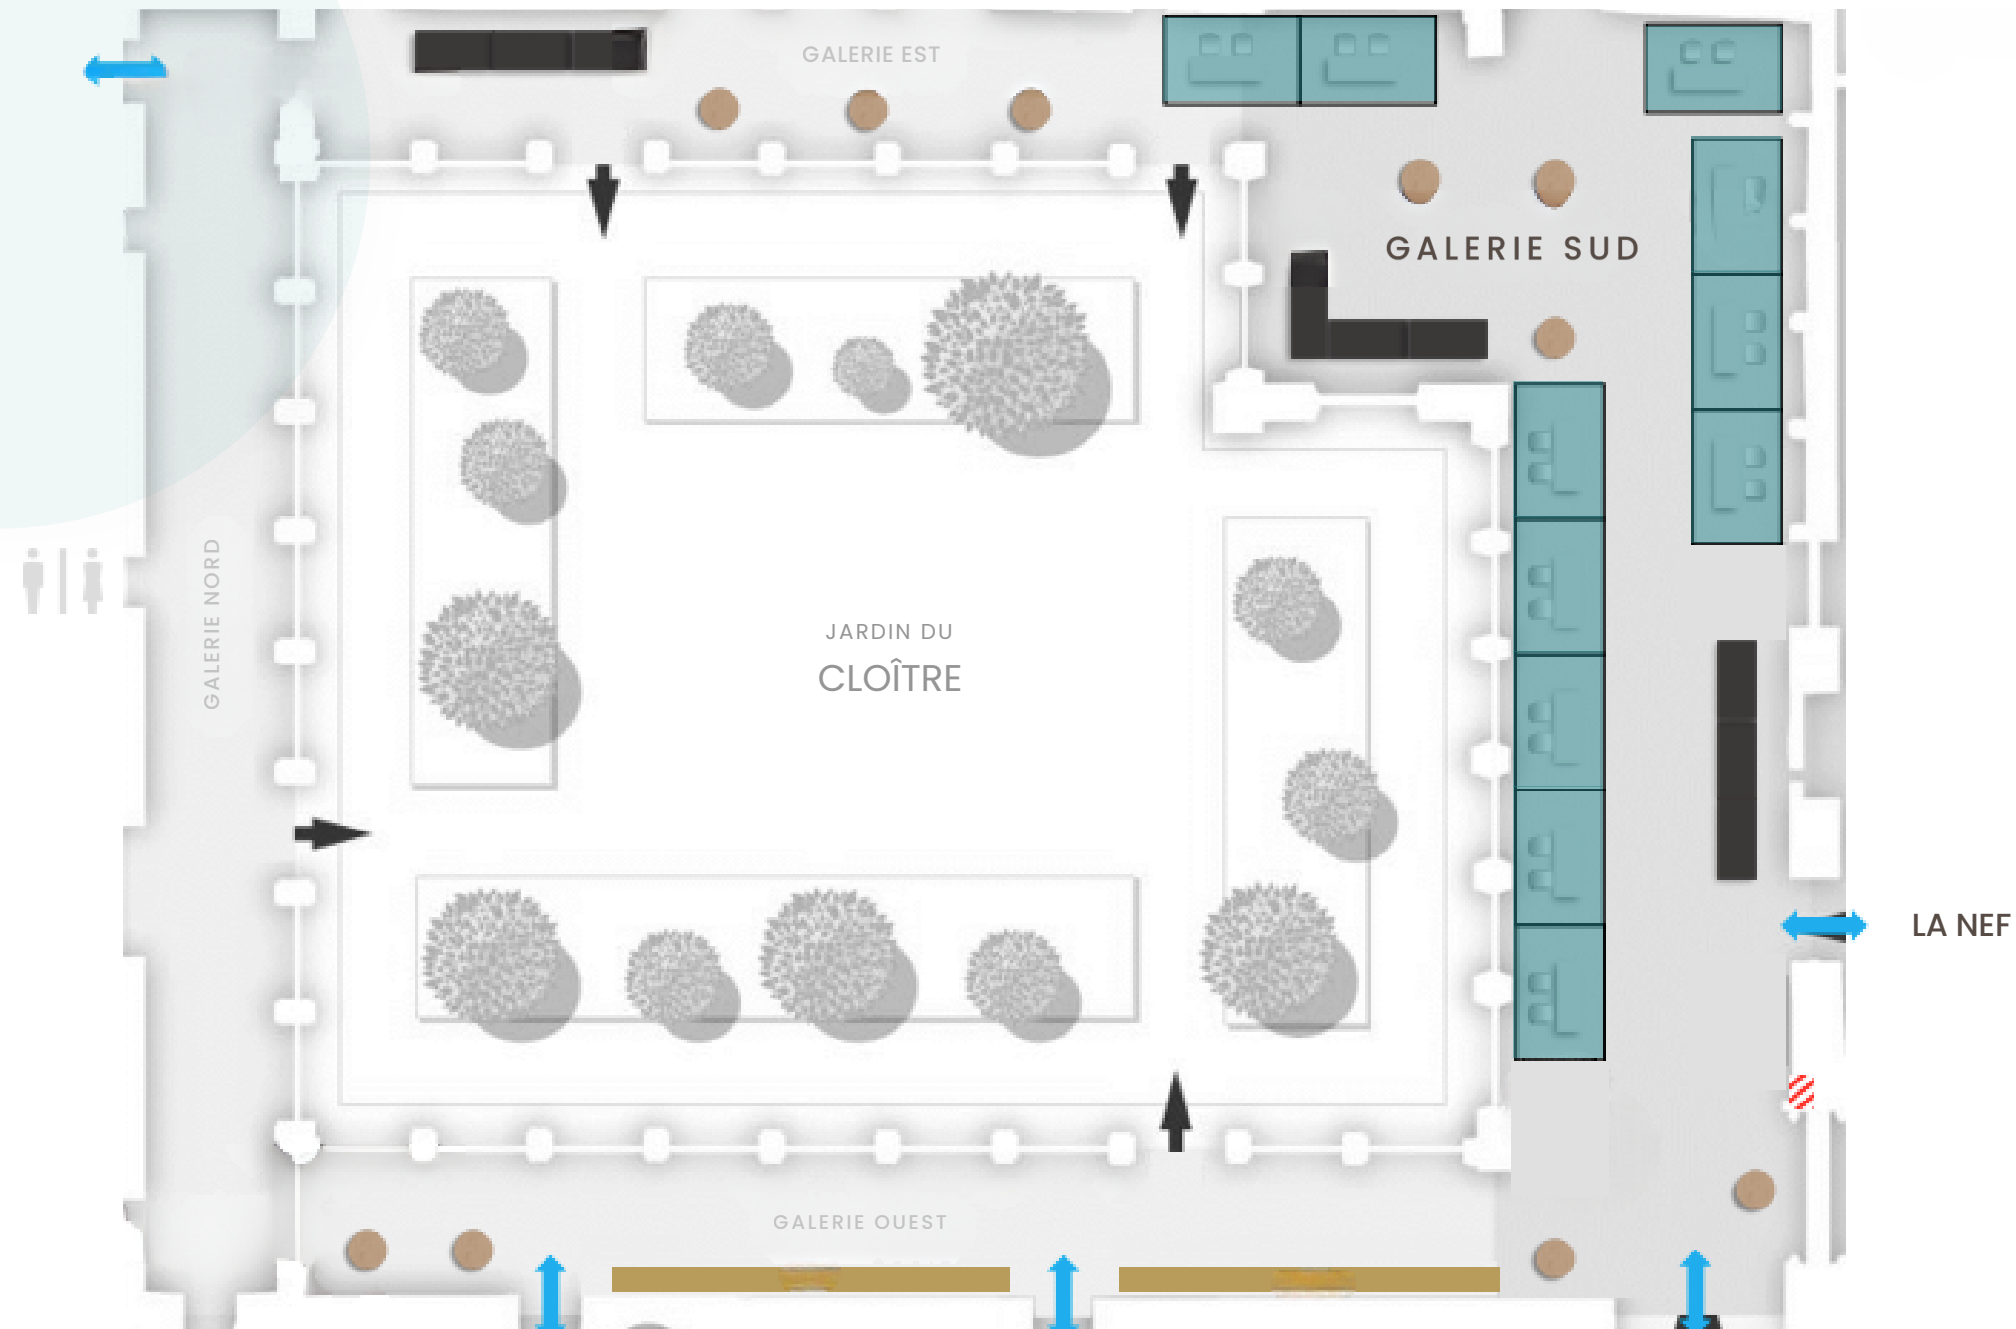

- Grants the access to the conference to several students for free. Selected students will be chosen based on the quality of the submitted abstracts.
- Name of your company/organisation displayed on the list of sponsors on the promotional material and on the website

1200 €*

*Other events are the icebreaker and the poster sessions.

*All prices are excluding VAT.

Exhibitors

Galerie Sud

Nef

Exhibition
space
6m² (3mx2m)
3000 €*

*The package includes access to a table (180cmx70cm) and two chairs as well as an electrical socket.
